Alkhidmat Foundation

GITHUB PROFILE

Ahsan-Iqbal02

SUMMARY

I am a **Software Engineering student** with a growing interest in building practical and user-focused applications. I have hands-on experience in C++ using object-oriented programming concepts, where I have developed projects such as a Library Management System and a Car Rental System.
Alongside this, I am currently expanding my knowledge in **AI/ML** through online learning. I enjoy solving problems, learning new technologies, and improving my technical and teamwork skills through real-world practice.
I am currently seeking an opportunity as a **Software Engineering Intern** where I can apply my skills, gain industry experience, and contribute to meaningful projects.
